

## Stop littering at St. Mary's.

St. Mary's would be a better place if everyone would put their rubbish in the bin. There are many reasons that are important as to why you should put your rubbish in the bin.

Firstly, we need to stop dropping rubbish on the ground because when it rains the rubbish will end up in the ocean. This means we are putting rubbish in the ocean and as a result animals could choke and starve to death. If you don't want animals to die, [STOP LITTERING!](#)

Secondly, when we litter we are not being a good steward of God's creation. Being a steward means you have to stop littering. When you see a piece of rubbish you can pick it up and put it in the bin. When you are doing this, you are being a steward of creation.

Lastly, our school is becoming a very big mess with all of the rubbish. When you do litter, we are not respecting our school and the environment. There are a lot of spots around our school with rubbish and there are lots of bins so use them instead of being lazy!

It is obvious that we can make St. Mary's a better place by not littering. If we do litter some of the animals could choke and starve to death. We are called to be a steward of God's creation so make sure you show respect and do not destroy our environment.
